

Over moulded RD6 Resistances

ON-BOARD RESISTANCES

ELECTRICAL BONDING RESISTANCES

FEATURES & BENEFITS

- Compact
- Light weight
- Shock resistant to harsh conditions

APPLICATIONS

- Electrical bonding resistance between car body and bogie for bearings not equipped of an ERCU

If we do not take any special provisions, axle boxes bearings are mounted in parallel to ERCU's.

Two parallel currents will then be established. One across the ERCU and the other through the bearings of the axle boxes. The current will flow through these 2 circuits inversely to the value of the impedances.

When the train is stopped, the bearings are less resistant than the ERCU, they will be crossed by a considerable current coming from "auxiliary" circuits and in addition, the high starting current.

When rotating the bearings become approximately 80 times more resistant compared against the stopped position and it will be the ERCU which will have the lowest impedance, but the remaining current which will pass through the rolling is enough to cause serious damage.

To avoid this phenomena, each axel box unequipped of ERCU is provided with an additionnal bonding resistance installed between the car body and the bogie to increase the resistance and make the current flow through the bearing equipped with and Earth Return Current Unit.

no current will be diverted through bearings w/o ERCU.

PRODUCT RANGE

OVM RD6

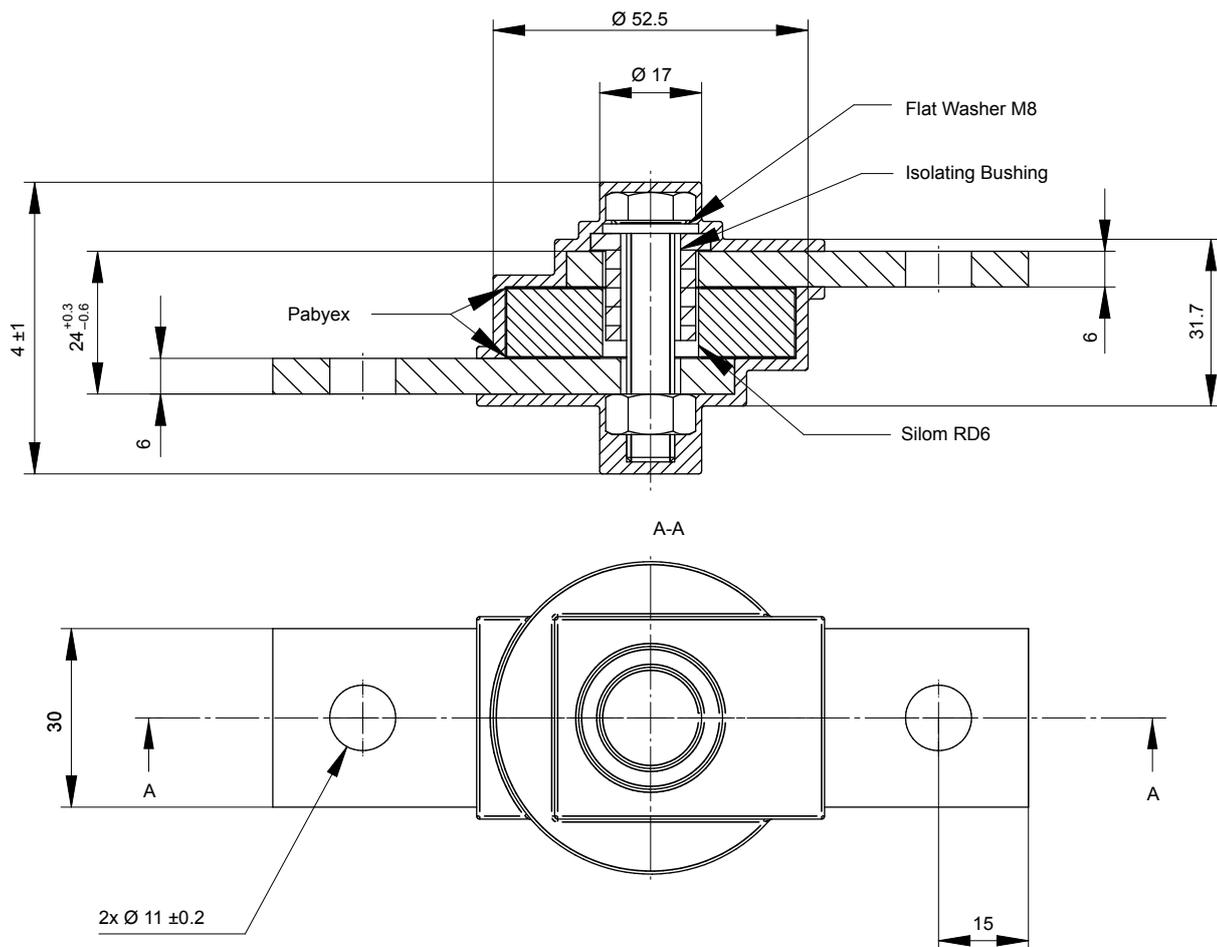

Catalog number	Item number	Resistance value	Tolerance	Weight
OVM RD6 R0,04/10 EPAIS:10	N1056356A	0.04 ohm	± 10%	80 g
OVM RD6 R0,04/20 EP:10	R1056359A	0.04 ohm	± 20%	80 g
OVM RD6 R0,05/20 EPAIS:10	V1056362A	0.05 ohm	± 20%	80 g
OVM RD6 R0,10/10 EPAIS:10	X1056364A	0.1 ohm	± 10%	80 g

TECHNICAL DATA

OVM RD6	
Mounting	SCREWED

Over moulded RD6 Resistances

FUNCTIONS

Connexion cables + Braided cable

Connexion cables or braided cables are studied for your application.

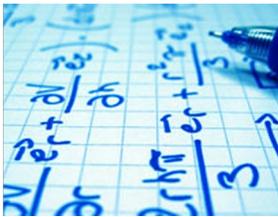

Mersen can supply and guarantee them.

They are delivered with the possibility to customized the total length plus the adapted hardware for bolted joint.

Training and technical support

All around the world, Mersen technical team can help you for technical support and can offer you customized training sessions for your Maintenance team.

LCC; RAMS; Type tests

Mersen teams can supply Life Cycle Costs “LCC” and Reliability Availability Maintainability Safety “RAMS” and Faillure Mode and Effect Analysis “FMEA” studies. They can operate Qualification type tests.

ACCESSORIES

Silohm resistances

Silohm resistances

Catalog number	Item number	Weight
Silohm resistances		
COVER 8x53	Y1048430	10 g
INSULATING BUSHING 30X18	G154014	25 g
PAPYEX WASHER EP:0,4 48MM	Z202445A	5 g
RD6 R0,010/10 EPAIS.11	P1048422A	40 g
